

Health Science Education (HSE) Industry Certification (IC) Program Curriculum Standards Documentation Requirements/Information

Congratulations for meeting the criteria to pursue Industry Certification! Although you will teach all courses and standards for your pathway as usual, your program will be evaluated as outlined below.

1. Select three [standards](#) from each course taught:
 - Consider standards that are most critical for mastery of course content and career/postsecondary success.
 - Showcase artifacts for each of these standards and elements (substandards) – artifacts should be no more than 2 years old
2. Required documentation:
 - Lesson plan for **each** standard **and** element
 - Student work – evidence of teaching/learning – assignments, projects, etc – show examples from the past two years
 - Evaluation of student work – assessments, rubrics – examples from the past two years
 - Upload documents and artifacts to your website – protect student privacy
 - Pictures may be used as supporting evidence but do not take the place of rubrics and assessments
3. Industry Certification Final Evaluation (onsite or virtual)
 - Coordinate date with HSE IC Coordinator and Hometown Health University
 - Select and secure at least six local health care professionals to serve as evaluation team members
 - Select a total of three to ten students for interviews
 - Arrange for interviews with guidance counselor and administrator(s) – Principal or designee and CTAE Director
 - Using the POS checklists, evaluation team will determine if teacher(s) and program meet the exemplary status of Industry Certified Program for Healthcare Science. HSE IC Coordinator will prepare final report.
4. Industry Certified programs and teachers will be recognized at the annual Summer GACTE-GADOE-CTAE Conference during the Healthcare Science Technology Educators Association (HSTEA) Awards Program in June.
