

Healthcare Science Education (HSE) Industry Certification (IC)

Why Program Industry Certification?

- Healthcare continues to be one of the nation's fastest-growing and competitive industries.
- Secondary schools bear a responsibility to educate and train students who are skilled and academically prepared, to complete a post-secondary/college-level health career program.
- One assessment that is generally accepted across various disciplines to ensure that an educational program is standardized in Georgia is the Secondary Program Industry Certification.
- Guided and Approved by the Georgia Department of Education for secondary Healthcare Science programs.
- *The Award of Healthcare Science Education Industry Certification* is announced at the oral and written Report time period of the On-Site Evaluation. The Awards (plaque & banner) are presented at Georgia Association for Career & Technical Education (GACTE) – Georgia Department of Education Annual Summer Leadership Conference during the *Healthcare Science Technology Educators' Association (HSTEA) Awards Luncheon* in July.
- *Through this process, Excellent Healthcare Science teachers are recognized as providing exemplary Healthcare Science programs.*
